Thank you for purchasing my asset!!!
Your feedback motivates me to create new assets and modify them.

1) Use this tool. It will allow you to quickly connect modules. For internal modules, use "Move" 0.1

2) In the package manager, download these tools. They will allow you to use flexibly work with terrain and configure post processing
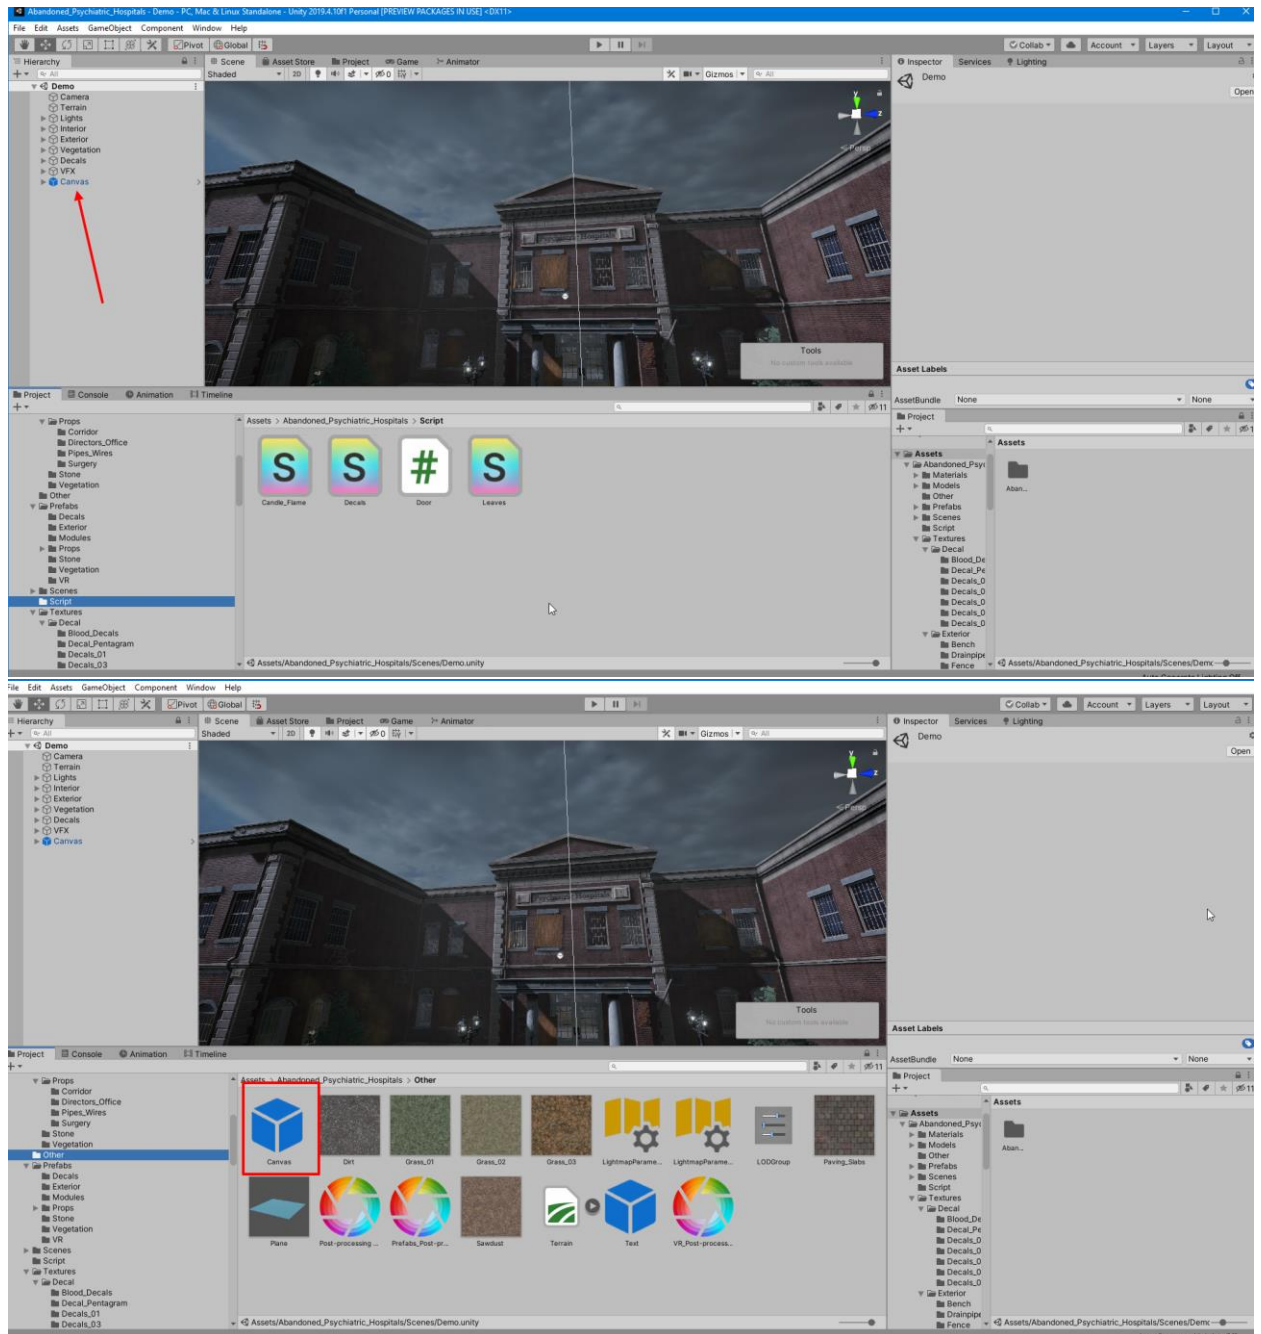

3) On the entire interior of the wall, you can apply 3 variants of the wall material.

4) In order for the doors to work it is necessary to pull out this element in the scene.

And enable Tag Player on your character

Thanks for your attention!!!
